1. Description

STB-CAS series current sensors are based on close loop principle with TMR technology. The sensor can detect the current with DC, AC, pulse and irregular wave shape.

Typical application

- Variable frequency converter
- Uninterruptible Power Supplies (UPS)
- Solar inverters.
- Direct-current dynamo
- Switched model power supplies (SMPS)

General parameters

Parameter	Symbol	Unit	Value
Working temperature	T_A	℃	-40 ~ 105
Storage temperature	T_stg	℃	-40 ~ 105
Mass	m	g	13

Absolute parameters

Parameters	Symbol	Unit	Value
Supply voltage	V _c	V	6
ESD rating (HBM)	U_ESD	kV	4
High temperature and humidity	T_HAST	-	85℃&85%RH (1000h)

Remark: the unrecoverable damage may occur when the product works on the conditions over the absolute maximum ratings. Long-time working on the absolute maximum ratings may cause the degradation on performance and reliability.

Isolation parameters

Parameter	Symbol	Unit	Value	Remark
RMS voltage for AC test 50Hz/1 min	U _d	kV	4	
Impulse withstand voltage 1.2/50μs	Ū _w	kV	6	
Clearance distance (pri.-sec)	d _{Cl}	mm	9.5	Shortest distance through air
Creepage distance (pri.-sec)	d _{Cp}	mm	9.5	Shortest path along device body
Electrical clearance	d _{Ce}	mm	6.1 (CAS/R)	When mounted on PCB with recommended layout
			6.3 (CAS)	
			8.5 (CAS/K)	
Case material			V0 according to UL 94	
Comparative tracking index	CTI	V	600	

2. STB-15CAS parameters

Condition: $V_{CC} = 5.0\text{ V}$, $NP = 1$, $R_L = 10\text{ K}\Omega$, $T_A = 25^\circ\text{C}$, unless specified.

Parameters	Symbol	Unit	Min.	Typ.	Max.	Remark
Primary nominal rms current	I_{pn}	A		15		
Primary current measuring range	I_{pm}	A	-51		51	
Supply voltage	V_c	V	4.75	5	5.25	
Consumption current	I_c	mA		$15 + \frac{IP \cdot NP}{NS \cdot 1000}$		NS = 1200
Current turns	NP	Turn		1, 2, 3		
Offset voltage	V_{off}	V	2.48	2.5	2.52	Output @ 0 A

12. Frequency band width

Fig.1 the band width of STB-xxCAS/x series current sensors. The bandwidth was tested after differential amplification with 1x magnification.

13. Step response time

Fig.2 the step response time of STB-xxCAS current sensors. The blue is primary current, while the green is output signal of current sensor. The step response time is less than 0.3 μ s.

Fig.4 the step response time of STB-xxCAS/R & STB-xxCAS/K current sensors. The blue line is primary current, while the green line is output signal of current sensor. The step response time is less than 0.3 μ s.

14. Frequency delay performance

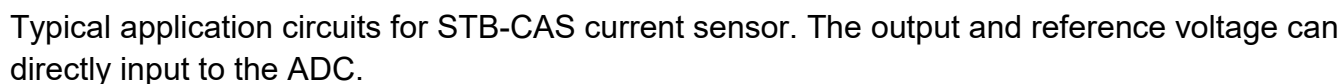

Fig.5 when detection the primary current with a frequency of 200 kHz. The delay time from primary current (blue) to the output of the sensor (green) is less than 0.3 μ s.

15. Typical application circuits

Typical application circuits for STB-CAS/K & STB-CAS/R current sensor. The magnification can be estimated as $M = R4 / R2$ with the condition of $R1 = R2$, and $R3 = R4$. The magnification in the circuit above is around 3.

The frequency characteristics of STB-CAS/X series current sensor are not affected by the R-C setting (according to recommended R-C setting), therefore the active filter circuit or R-C circuit can be applied to modulate the sensor's frequency characteristics.

16. Dimensions: STB-CAS

17. Dimensions: STB-CAS/R

Number of primary turns N_P	Recommended connections
1
